Dr. Lee will present findings from her mixed-methods study (STOP CRC) that examined facilitators and barriers to colorectal cancer (CRC) screening among Asian Americans. She will also introduce her newly funded randomized controlled trial (RCT) designed to increase colorectal cancer screening among Asian Americans at primary care setting using shared decision making model. In particular, she will explain how findings from STOP CRC contributed in designing the new culturally adapted study.

Join us for a reception in the break area after the presentation.

Co-sponsored by the Institute for Public Health, the Department of Obstetrics and Gynecology, the Department of Medicine, and the Department of Anesthesiology
