Post Doc Instructions
Please do not submit an application to this posting. To apply for this postdoctoral research opportunity, follow the directions below in “Applicant Special Instructions”.

Department Name/Job Location
This position is in the Department of Internal Medicine, Division of Infectious Diseases. This position is for the Medical School Campus.

Essential Functions
The Center for Dissemination and Implementation at Washington University in St. Louis seeks a post-doctoral research associate to conduct implementation research as a part of an emerging multi-sectoral effort to enhance prevention and treatment of HIV in St. Louis.

On December 1, 2019, St. Louis joined the leading edge of municipal public health efforts combating AIDS when Mayor Lyda Krusen and County Executive Sam Paige joined the Fast Track Cities Initiative, sponsored by the International Association of AIDS Care Physicians, and committed to ambitious but feasible targets for HIV control in St. Louis.

The Center for Dissemination and Implementation in the Institute for Public Health will work closely with government and community partners to support this emerging effort, including bringing expertise in implementation research to support this effort.

Candidates for this position will draw from epidemiology, social and network science, health communications, and organizational theory and apply perspectives from dissemination and implementation research to conduct high-impact research on the drivers of the HIV epidemic in St. Louis and identify scalable, adoptable and impactful solutions.

This position will involve significant time with the team at the Department of Health and therefore the candidate will gain hands on experience in how public health works in the real world. The candidate will be supervised by faculty mentors at WashU, including Director of Center for Dissemination and Implementation, and therefore acquire leading-edge scientific perspectives and methods in implementation research. The candidate will be expected to participate and present at a number of scholarly activities at WashU. The position will be funded for up to two years, with the possibility of a third.

Required Qualifications
Ph.D. degree level.

Preferred Qualifications
Experienced with presentations.
Salary Range
Base pay commensurate with experience.

Pre-Employment Screening
All external candidates receiving an offer for employment will be required to submit to pre-employment screening for this position. Current employees applying for a new position within the university may be subject to this requirement. The screenings will include a criminal background check and, as applicable for the position, other background checks, drug screen, employment and education or licensure/certification verification, physical examination, certain vaccinations and/or governmental registry checks. All offers are contingent upon successful completion of required screening.

Benefits
This position is eligible for full-time benefits. Please click the following link to view a summary of benefits: https://hr.wustl.edu/benefits/.

Applicant Special Instructions
To apply for this position, please send a cover letter, CV, contact information for three references and one key first author publication directly to sandler.brittany@wustl.edu or eshun-wilsonova@wustl.edu.

EOE Statement
Washington University is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, age, sex, sexual orientation, gender identity or expression, national origin, genetic information, disability, or protected veteran status.
